

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

May 5, 1978

Docket Nos. 50-327/328
50-390/391

Tennessee Valley Authority (Watts Bar, and Sequoyah)

All Power Reactor Licensees and Applicants with Docketed Applications
to Construct or Operate a Power Reactor

Gentlemen:

This letter and enclosed NUREG 0219, Draft 2 are being sent to all licensees authorized to operate a nuclear power reactor and to all applicants with applications for a license to operate or construct a power reactor.

NUREG 0219 outlines the current position of the NRR staff on implementation of the requirement to upgrade the qualification, training and equipping of security personnel. Since this is a draft, I would appreciate your comments by June 9, 1978 so that actual plant operating experience with security personnel can be factored into the final document.

Sincerely,

A handwritten signature in cursive script, appearing to read "James R. Miller", is written over a printed name and title.

James R. Miller, Assistant Director
for Reactor Safeguards
Division of Operating Reactors

Enclosure:
NUREG 0219, "Nuclear Security
Personnel for Power Plants, Review
Plan and Acceptance Criteria for a
Security Training Program"
