Environmental and Technical Support Branch
Division of Site and Environmental Reviews
Office of New Reactors
U. S. Nuclear Regulatory Commission

Re: Enhancing the efficiency and effectiveness of the Nuclear Regulatory Commission's environmental review process

Dear Mr. Clayton:

On behalf of the Blue Ridge Environmental Defense League and our members in Virginia, North Carolina, South Carolina, Tennessee and Georgia, thank you for inviting me to participate in this roundtable discussion.

The League has worked for decades to preserve environmental quality, promote public health, educate the public and hold government officials accountable. Towards this end, I have attached to this letter documents from our files on recent permits for nuclear power plants in the Southeast. These include letters, public comments and limited appearance statements, all of which address the environmental review process.

These documents will, I believe, provide comprehensive information to supplement my oral remarks at today's meeting regarding the NRC's environmental reviews. My hope is that the Office of New Reactors will consider this during its review Nuclear Regulatory Commission's environmental review process.

Respectfully,

Louis A. Zeller
