Re: Amendment request to our NRC Materials License # 06-28502-01

---

Dear Sir or Miss:

We are requesting a license amendment for the addition of a new imaging center, located at 399 Farmington Avenue, Suite 100, Farmington, CT 06030. This office is expected to open in mid-February of 2008, after which we will close the Avon office at 40 Dale Rd. The new office is in a newly constructed medical office building and we are not aware of any other user of radioactive materials at that address.

The Hot Lab entry door will use an ID card reader in order to gain access. This provides greater security for the materials delivered and kept on hand. We plan on equipping the Hot Lab with a base cabinet, a counter-top + sink, an L-block shield, dose calibrator, shielded prep area, GM survey meter, NaI probe + scaler, some above/below cabinet storage for records, wastes and supplies. The nuclear medicine service area diagram is enclosed for your files.

Should you have any questions or desire additional information regarding our private, nuclear medicine imaging office, please contact me, or, Dr. Ronald J. Rosenberg at 860-246-6589. We look forward to a continued safe and effective materials program. Thank you.

Respectfully submitted,

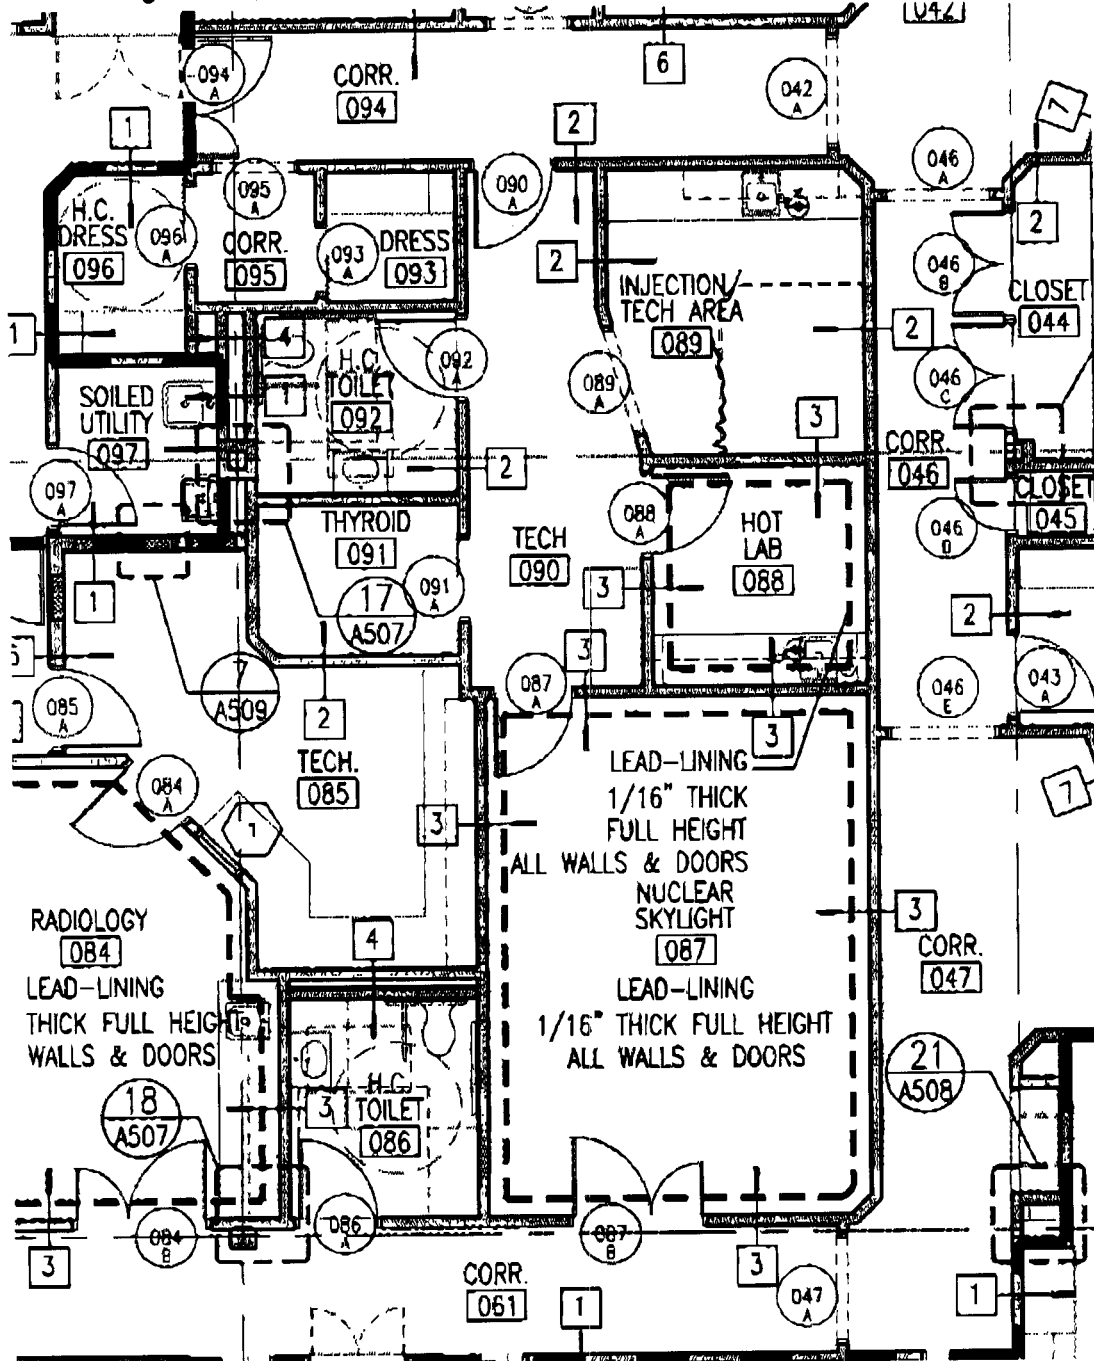

Mark Grossman, CEO
