SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE,
LICENSE NO. 21-05199-03

Dear Ms. Smith:

By letter dated August 20, 2007 (with attachments) and December 3, 2007, you requested that we terminate your NRC radioactive material license, License No. 21-05199-03, (having expiration date of February 28, 2011) and provided information confirming final disposition of licensed material possessed for the make and model of detector cell listed on your license, by transfer to a licensed disposal entity. The records provided also showed the non-leaking status of the sources transferred to the disposal entity. You also confirmed that the replacement Electron Capture Detector (ECD) obtained by you was an Agilent Technology Model G2397-65505 and that it was "covered under the manufacturer's NRC General License". Please be aware that General Licensed devices are manufactured and distributed by entities having an NRC specific license, but the user of the device is the entity having the NRC general license, as described in 10 CFR 31.5. Based on information you have provided to us, we have concluded that licensed material is no longer used or possessed under NRC License No. 21-05199-03, permitting us to terminate the license as requested. Accordingly, an amendment is enclosed, terminating your NRC License No. 21-05199-03.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

Loren G. Hueter
Materials Licensing Branch
