U.S. Nuclear Regulatory Commission ATTN: Document Control Desk Washington, DC 20555

Gentlemen:

In the Matter of the Application of ) Docket Nos. 50-390 Tennessee Valley Authority ) 50-391

WATTS BAR NUCLEAR PLANT (WBN) - FINAL ENVIRONMENTAL IMPACT STATEMENT (EIS) - RESULTS OF REVIEW (TAC NOS. M88691 AND M88692)

This responds to the NRC's letter dated March 9, 1994. In that letter, the NRC requested that TVA provide updated environmental information relevant to the staff's review of the WBN Final Environmental Statement.

In accordance with the regulations promulgated by the Council on Environmental Quality and TVA's procedures implementing the National Environmental Policy Act, TVA has considered whether substantial changes have occurred at WBN that were relevant to environmental concerns or whether there were significant new circumstances or information relevant to environmental concerns and bearing on the WBN project. Based on a comprehensive review of WBN project changes and new information, TVA determined that the environmental impact statement for the WBN project did not have to be supplemented. The results of this review are summarized in the enclosed report, "Watts Bar Nuclear Plant, Review of Final Environmental Statement," dated August 1993.
