Dear the Nuclear Regulatory Commission -

RECEIVED

I was very surprised to discover that plans on building the Watts Bar Nuclear Power plant are going ahead as usual.

S. Flanders

59FR63832

Considering:

~~12/9/94~~ 12/9/94

- ① - The site is located conveniently between Knoxville & Chattanooga.
- ② - The project is 16 years behind schedule.
- ③ - TVA rated The Watts Bar Plant the highest plant with the highest probability of a meltdown.
- ④ - Safety concerns have been a continuous problem in the building process.

(14)

The Watts bar plant should NOT be licensed.

Watts Bar plant is a bad & dangerous idea & it should NOT be licensed.

Sincerely,
Lenny Barnes
