Director of Nuclear Reactor Regulation
Attention: L. S. Rubenstein, Acting Chief
Light Water Reactors Branch No. 4
Division of Project Management
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Rubenstein:

In the Matter of the Application of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328
50-390
50-391

During the past three years, varied submittals (plans or revisions thereto) have been provided to the Nuclear Regulatory Commission (NRC) pertaining to Sequoyah and Watts Bar Nuclear Plants Security, Contingency, and Training and Qualification Plans. Each of these documents has requested that an individual within NRC return receipts for the proprietary plans along with superseded material to Tennessee Valley Authority. Instructions for the return of the affected material are found on the numbered receipt and instruction sheet for each plan or revision.

To date, the NRC has not returned return receipts and/or the superseded material as requested. We believe that your staff understands the nature of making certain that sensitive proprietary information is controlled. Enclosed is a list of all the material provided to the NRC with the corresponding date and description of each submittal. Please return the return receipts and/or superseded material as described in the enclosure. We would appreciate your cooperation in dealing with this matter. If you have any questions, please get in touch with me.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills
L. M. Mills, Manager
Nuclear Regulation and Safety

Enclosure

5003
