In a letter from O. D. Parr to H. G. Parris dated April 24, 1980, TVA was requested to provide additional information concerning the Bellefonte Nuclear Plant Training and Qualification Plan. Enclosed are four copies of TVA's response and revisions dated May 21, 1980, with instructions for updating NRC copies 6 through 10 of the Bellefonte plan. Since the additional information requested is pertinent to the training and qualification plans for Sequoyah and Watts Bar Nuclear Plants, we are also forwarding the same revisions with instructions for revising NRC copies 6 through 10 of the Sequoyah and Watts Bar plans.

In my letter to you dated May 16, 1980, TVA provided revisions dated April 15, 1980, for Sequoyah and Watts Bar Nuclear Plants Safeguards Contingency Plans. It has been noted that an incorrect revision date was shown on page 5-5. Enclosed are revised pages 5-5 and 5-6 with the correct revision date of April 15, 1980. These revised pages should be inserted in copies 6 through 10 of the NRC plans for the subject nuclear plant, and the removed pages should be destroyed.

On April 7, 1980, a telephone conference call was held between R. B. Manili of the NRC and various TVA employees. During this conference call, TVA was requested to provide additional information concerning TVA's nuclear plant Safeguards Contingency Plans. The
