Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

Enclosed are 15 copies of TVA's proposed modifications to the NRC draft version of the Watts Bar Technical Specifications. Enclosure 1 provides our most recent proposed modifications to the specifications. Enclosure 2 provides proposed modifications which were previously transmitted in our submittal of September 15, 1982 but which have not been incorporated into the specifications. Included with each modification is a marked-up page of the specification along with a justification for the change.

With the Watts Bar unit 1 fuel load scheduled for January 1984, resolution of outstanding items and issuance of the "proof and review" copy of the specifications by NRC is requested at the earliest date possible. TVA is prepared to support all activities necessary to resolve the remaining open items.

We wish to reiterate the NRC position as stated in a June 22, 1982 letter from R. L. Tedesco (NRC) to H. G. Parris (TVA) which states that (1) the Watts Bar draft technical specifications are currently based on Revision 4 of NUREG-0452 and, (2) that the NRC would not require the Watts Bar draft technical specifications to be updated to the next revision of NUREG-0452 except in matters of significant safety importance.

If you have any questions concerning this matter, please get in touch with D. B. Ellis at FTS 858-2681.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
