Mr. James P. O'Reilly, Director
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission
Region II - Suite 3100
101 Marietta Street
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - STEEL CONTAINMENT PENETRATION
ASSEMBLY - WBRD-50-390/81-08, WBRD-50-391/81-07 - SECOND INTERIM REPORT

The subject deficiency was initially reported to NRC-OIE Inspector
F. Cantrell on December 19, 1980, in accordance with 10 CFR 50.55(e) as
NCR WBN CEB 8014. Our first interim report was submitted on January 19,
1981. We expect to provide additional information by June 16, 1981.

TVA has completed the reanalysis of steel containment penetrations for
Sequoyah Nuclear Plant and did not identify any design changes resulting
from this condition. Similar results are expected for Watts Bar. We
will provide the results of the Watts Bar reanalysis in our final report.

If you have any questions, please get in touch with D. L. Lambert at FTS
857-2581.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
