

JUL 23 1981

Docket Nos: 50-390  
and 50-391

Mr. H. G. Parris  
Manager of Power  
Tennessee Valley Authority  
500A Chestnut Street, Tower II  
Chattanooga, Tennessee 37401

Dear Mr. Parris:

SUBJECT: REQUEST FOR SCHEDULE FOR INSTALLATION OF PUBLIC  
NOTIFICATION SYSTEM

Appendix E, Section IV.D.3 to 10 CFR Part 50, requires applicants for nuclear power reactor licenses to demonstrate that administrative and physical means have been established for alerting and providing prompt instructions to the public within the plume exposure EPZ in the event of an emergency. As part of our review for an operating license for Watts Bar Nuclear Plant, Units 1 and 2 please provide confirmation by August 11, 1981 that a prompt notification system will be installed including a schedule for installation, a description of the system, and a description or listing of the problems that may hinder implementation. Your verification that a public notification system meeting the regulations is in place is required prior to issuance of a license for power operation. We expect that the Federal Emergency Management Agency will review the adequacy of the system by evaluating the results of an actual system test, probably during the joint exercise of your facility with offsite authorities.

A copy of your response should be provided to Brian Grimes, Director, Division of Emergency Preparedness, Washington, D.C. 20555.

Sincerely,

Original signed by  
Robert L. Tedesco

Robert L. Tedesco, Assistant Director  
for Licensing  
Division of Licensing
