Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Ms. Adensam:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

During a telephone conference call on March 12, 1982, TVA discussed the Seismic Qualification Review Team audit for Watts Bar Nuclear Plant. At that time, the NRC proposed that the audit of equipment be conducted the week of April 19, 1982. Because of previously assigned work on Sequoyah Nuclear Plant, TVA is unable to support this schedule. As discussed with the NRC project manager on March 29, 1982, TVA is prepared to support an NRC audit after April 26, 1982. This schedule is contingent upon expeditious receipt of the list of equipment for which the NRC requires additional information.

If you have any questions concerning this matter, please get in touch with D. P. Ormsby at FTS 858-2682.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Regulation and Safety

Sworn to and subscribed before me
this 30th day of March 1982

Paulette H. White
