Dear Mr. Haass:

In my letter to you dated July 23, 1982, the applicability of the TVA QA Topical Report, TVA-TR75-1A to TVA's design, construction, and operational phase activities at each of our nuclear facilities was defined. In that letter, it was stated that TVA-TR75-1A would be applicable to the design and construction phase activities at Watts Bar and Bellefonte Nuclear Plants when the respective Final Safety Analysis Reports (FSARs) were next amended; and these FSARs would be amended before January 1, 1983. The Bellefonte FSAR, section 17.1 has been revised by amendment 23 issued on December 17, 1982 and Watts Bar FSAR, section 17.1 will be revised by amendment 47 to be issued on January 4, 1983.

Very truly yours,
