Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

Please refer to my letter to you dated January 4, 1984 which provided supplemental information addressing specific concerns identified by NRC as a result of your review of our submittals on NUREG-0737, Item II.F.2 for the Watts Bar Nuclear Plant.

In providing additional information relating to the installation and preoperational testing schedules for the Reactor Vessel Level Instrumentation System (RVLIS), TVA inadvertently included inconsistent statements regarding the schedule for preoperationally testing the RVLIS. The correct schedule for these preoperational tests is before initial criticality of the respective units. Please revise your records accordingly.

If you have any questions concerning this matter, please get in touch with D. B. Ellis at FTS 858-2681.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills
