

15.7 Radioactive Release from a Subsystem or Component**15.7.1 Radioactive Gas Waste System Leak or Failure**

Radioactive gas waste system leaks or failures are described in Section 11.3.3.6.

15.7.2 Radioactive Liquid Waste System Leak or Failure

Radioactive liquid waste system leaks or failures are described in Section 11.2.3.6.

15.7.3 Postulated Radioactive Releases due to Liquid-Containing Tank Failures

Radioactive liquid waste system leaks or failures are described in Section 11.2.3.7.

15.7.4 Radiological Consequences of Fuel Handling Accidents

The radiological consequences of fuel handling accidents are described in Section 15.0.3.10.

15.7.5 Spent Fuel Cask Drop Accidents

The spent fuel cask handling equipment is designed so that no cask can be dropped from more than the equivalent of 30 feet (refer to Section 9.1.4.3). No cask rupture can occur, no radioactivity is released, and thus a radiological consequence calculation is not necessary. Refer to Section 9.1.4 for a description of the spent fuel handling equipment and procedures.
