

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

June 5, 1984

Docket Nos: 50-390  
and 50-391

Mr. H. G. Parris  
Manager of Power  
Tennessee Valley Authority  
500 A Chestnut Street, Tower II  
Chattanooga, Tennessee 37401

Dear Mr. Parris:

Subject: TVA's Reorganization

Through recent meetings and discussions with your staff, the NRC staff has been made aware that TVA is undergoing a major reorganization that will affect the Watts Bar Nuclear Plant site as well as the corporate headquarters. It is our understanding that the reorganization is expected to be put in effect about the time the Watts Bar facility is scheduled to load fuel.

As you are aware, 10 CFR 50.34(b)(6) requires that each application for a license to operate a facility shall include: "The applicant's organizational structure, allocations or responsibilities and authorities, and personnel qualification requirements."

At present, portions of Chapter 13 of the Watts Bar FSAR may be incorrect for the facility at fuel loading, and therefore, the conclusions reached in the Watts Bar Safety Evaluation Report (NUREG-0847, June 1982) supporting the facility's fuel load may no longer be valid. As the staff will need approximately 30 days to evaluate your organizational changes, and their possible effects on quality assurance, training, technical support, and the technical specifications, we request you provide this information by June 24, 1984.

If you have any questions concerning this matter, please contact the project manager, T. J. Kenyon, at FTS 492-7266.

Sincerely,

  
Thomas M. Novak, Assistant Director  
for Licensing  
Division of Licensing
