Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of the Application of)	Docket Nos.	50-390
Tennessee Valley Authority)		50-391

Please refer to L. M. Mills' letter to H. R. Denton dated September 17, 1984 which provided TVA's supplemental response to Generic Letter 83-28, "Required Actions Based on Generic Implications of Salem ATWS Events," Section 2.2.2, "Vender Interface Programs" for TVA's Browns Ferry, Sequoyah, and Watts Bar Nuclear Plants and D. S. Kammer's letter to you dated October 24, 1984 in which TVA committed to various completion dates based upon a specified fuel load date of March 15, 1985.

The purpose of this letter is to advise you of progress made in implementing the Nuclear Plant Reliability Data System (NPRDS) at Watts Bar Nuclear Plant (WBN). At this time over 50% of the components for unit 1 and common have been collected and are being entered in TVA's central data base in Chattanooga. Based upon manpower and work load, TVA is projecting that the remainder of the unit 1 and common data will be collected and transmitted to the Institute of Nuclear Power Operations (INPO) by approximately the first week of September 1985.

Please be aware that TVA will meet its commitment to have NPRDS in place by commercial operation of each unit respectively.
