Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of the Application of Tennessee Valley Authority) Docket Nos. 50-390
) 50-391

Please refer to my letter to you dated June 6, 1985 concerning progress made in implementing the Nuclear Plant Reliability Data System (NPRDS) at Watts Bar Nuclear Plant (WBN).

WBN completed the collecting and keying in of the unit 1 and common NPRDS data on August 16, 1985. The week of August 19 through August 23 was allotted for editing the data base to correct typographical errors and to verify format. The unit 1 and common data is now ready for TVA to process the transfer of information to the Institute of Nuclear Power Operations.

The unit 2 NPRDS data will be completed after the components have been installed by the Office of Construction. The current fuel load schedule for unit 2 is March 1987.

If you have any questions concerning this matter, please get in touch with K. P. Parr of my staff at FTS 858-2682 in Chattanooga.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
