Gentlemen:

In the Matter of the Application of)
Tennessee Valley Authority)

Docket Nos. 50-390
50-391

WATTS BAR NUCLEAR PLANT (WBN) - ANTICIPATED TRANSIENT WITHOUT SCRAM MITIGATION
SYSTEM ACTUATION CIRCUITRY (AMSAC) - SCHEDULE FOR RESPONSE TO NRC'S REQUEST
FOR ADDITIONAL INFORMATION

R. H. Shell's letter to H. R. Denton dated October 11, 1985, informed NRC of
TVA's intent to install AMSAC at WBN, based on the generic functional design
developed by the Westinghouse Owner's Group (WOG). T. J. Kenyon's letter to
S. A. White dated November 7, 1986, provided the results of NRC's staff review
of the WOG Topical Report WCAP-10858, "AMSAC Generic Design Package," in the
form of a safety evaluation (SE). Appendix A of the SE requested plant-
specific additional information be provided to allow NRC to complete their
review.

TVA currently plans to respond to this request for additional information by
February 28, 1989.

If there are any questions, please telephone J. A. McDonald at (615) 365-8650.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
