RE: Tom's River Cardiac Diagnostic Center 03034250  
License Number: 29-30344-01  
Response Letter - Amendment to Close-Out Survey  
Control Number: 141271

Dear Ms. Roldan:

Pursuant to your recent conversation with Michael W. Lairmore, our Medical Physics Consultant, the following information is provided in support of our pending amendment application.

We confirm the sealed sources used for instrument calibration were leak tested at the time of shipment. Summary results reveal that no removable contamination in excess of 0.001 uCi was detected through this analysis. Upon receipt at the new imaging center, each sealed source was inventoried and placed in the hot lab for storage.

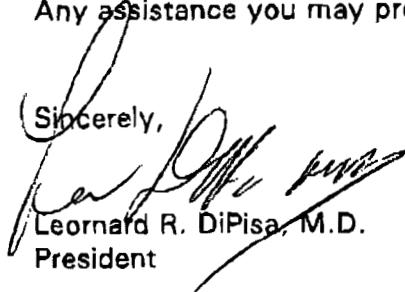

Radioactive waste was decayed-in-storage for ten half-lives and monitored before disposal. All survey measurements confirm ambient exposures at background radiation levels. The non-radioactive waste was disposed as normal trash and/or regulated medical waste.

141271

If you require additional information, please contact Michael Lairmore at (201) 693-2277.

Any assistance you may provide in expediting this licensing action is greatly appreciated.

Sincerely,

A handwritten signature in black ink, appearing to read 'Leonard R. DiPisa', is written over the printed name and title.

Leonard R. DiPisa, M.D.
