Gentlemen:

In the Matter of the Application of)
Tennessee Valley Authority)

Docket Nos. 50-390

WATTS BAR NUCLEAR PLANT (WBN) - HEAT CODE TRACEABILITY CORRECTIVE ACTION
PROGRAM (CAP) COMPLETION

Revision 2 to the Heat Code Traceability CAP was submitted to the Nuclear Regulatory Commission (NRC) on September 21, 1989. NRC inspection 390, 391/90-02 reviewed implementation of the CAP. TVA's final report on the CAP was issued February 9, 1990 and proposed Final Safety Analysis Report (FSAR) revisions were submitted to NRC by letter dated July 31, 1990. This letter is to notify NRC that TVA has completed the Heat Code Traceability Corrective Action Program, thereby providing assurance that WBN meets licensing requirements regarding traceability of loose piping material and ASTM attachment material installed in ASME applications. This submittal contains no new commitments.

If there are any questions, please telephone P. L. Pace at (615) 365-8527.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
