Gentlemen:

In the Matter of the Application of) Docket No. 50-390
Tennessee Valley Authority)

WATTS BAR NUCLEAR PLANT (WBN) - CONTROL OF MICROBIOLOGICALLY INDUCED CORROSION
(MIC) AT WBN

NUREG-1232, Volume 4, "Safety Evaluation Report on the Watts Bar Nuclear Performance Plan," dated December 28, 1989, required TVA to establish a MIC program for WBN. The enclosure, Site Director Procedure TI-36, describes the program for the monitoring, detection, assessment of extent, and control of MIC at WBN. This program satisfies the above requirement and is provided for your information. TVA is currently performing an assessment of systems that could be potentially affected by MIC. In conjunction with this assessment, TVA is developing required actions. This information will be the subject of discussion with the Region II staff in the near future. In addition, TVA is continuing the development of implementing instructions for the MIC program.

If there are any questions, please telephone P. L. Pace at (615) 365-1824.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
