Re: Byproduct Materials
License No. 52-30886-01

03036513

Gentlemen:

On November 30, 2007 NRC terminated the waiver issued on August 31, 2005, which allowed continued use and possession of naturally-occurring and accelerator-produced radioactive materials (NARM).

It is our understanding that we are required to apply for license amendments for the new byproduct material. To that effect, enclosed please find a copy of the first page of the state license we have which lists the accelerator-produced radioactive materials for which the Commonwealth of Puerto Rico has granted us authorization to use and possess until the present time.

It is hereby requested that you grant us the necessary license amendments to cover these radioactive materials.

Please, advise us if there is any additional information required.

Cordially,

Astro Muñoz, MHSA
Executive Director
