Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority)

WATTS BAR NUCLEAR PLANT (WBN) UNIT 1 - QUALITY ASSURANCE (QA) RECORDS
CORRECTIVE ACTION PROGRAM PLAN, REVISION 4

The purpose of this letter is to submit Revision 4 of the QA Records Corrective Action Program (CAP) Plan for WBN Unit 1. This plan has been revised to incorporate the Additional Systematic Records Review (ASRR) and the TVA response to NRC's August 30, 1991 request for additional information.

Please note that in making this change to consolidate the CAP and the ASRR we have attempted to retain, as much as possible, the original format of both documents to facilitate your review. For this reason we have incorporated the ASRR Program Description as an attachment in the CAP Plan.

You will notice that the CAP has been updated considerably from the Revision 3 version to indicate the results of work already accomplished. Because of the general nature of the changes to the base portion of the CAP, no revision bars are used. The ASRR Program Description (Attachment 6) has been updated to include changes based on comments received from NRC since its initial submittal in January 1991. Because these changes are more specific, revision bars have been used in Attachment 6 to indicate changes made since the initial submittal.

DEC 06 1991

TVA is confident that through the effective implementation of this CAP the necessary QA Records will exist and be retrievable in an acceptable manner with the required quality and technical content to permit the licensing of WBN Unit 1. Accordingly, NRC review and approval of this revision is requested.

Should there be any questions on this information, please contact P. L. Pace at (615) 365-1824.

Sincerely,

John H. Garrity
