Washington, D.C. 20555

Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

WATTS BAR NUCLEAR PLANT (WBN) UNITS 1 AND 2 - INCORRECT PRESSURE SWITCH
SETPOINTS FOR ERCW SCREEN WASH PUMPS - WBRD-50-390/86-58 AND
WBRD-50-391/86-55 - SUPPLEMENTAL INFORMATION

The subject deficiency was initially reported to NRC Region II Inspector
Gordon Hunegs on June 17, 1986, in accordance with 10 CFR 50.55(e) as
Significant Condition Report (SCR) WBN MEB 8663. Our interim and final
reports were submitted on July 21 and October 7, 1986.

In our final report, the following statement was made:

TVA's Division of Nuclear Engineering (DNE) has implemented NEP 3.1 which
details the way calculations are developed, controlled, issued, and used.
NEP 3.1 states that, "Calculations shall be used on all TVA designs where
design input and output documents need further development or improving."

Please change "improving" to "proving." This was a grammatical error.
This change was discussed with Glenn Walton on May 3, 1988.

If there are any questions, please telephone C. J. Riedl at (615) 365-8527.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
