Gentlemen:

In the Matter of the Application of )  
Tennessee Valley Authority ) Docket Nos. 50-390  
50-391

WATTS BAR NUCLEAR PLANT (WBN) UNITS 1 AND 2 - LIMITORQUE MOTOR ACTUATOR  
COMPONENT INTERCHANGEABILITY - WBRD-50-390/87-18 AND WBRD-50-391/87-21 -  
SUPPLEMENTAL REPORT

The subject deficiency was initially reported to NRC Region II Inspector  
Gordon Hunegs on September 24, 1987, in accordance with 10 CFR 50.55(e)  
as Condition Adverse to Quality Reports WBP 870833 and WBP 870900. Our  
interim and final reports were submitted on October 26, 1987, and  
June 15, 1988, respectively.

In our final report, TVA committed to issuing design information by  
September 30, 1988, to identify those unique parts of safety-related  
Limatorque actuators which affect actuator design function. This date will  
not be met. This is the result of a revised schedule for completing actuator  
inspection and diagnostic testing which are prerequisite to issuance of the  
design information. The revised schedule for issuing the design information  
is October 1, 1990. The enclosure lists the commitment made in this submittal.

If there are any questions, please telephone G. R. Ashley at (615) 365-8527.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
