REPORT

The subject deficiency was initially reported to NRC Region II Inspector Bob Carrol on January 24, 1986, in accordance with 10 CFR 50.55(e) as Nonconforming Condition Report (NCR) W-329-P. This was followed by an interim and a final report submitted on March 7, and September 5, 1986, respectively. In our final report, the deficiency was identified as being applicable to valves in both units. However, no unit 2 tracking number was designated. Please track this reported deficiency under WBRD-50-391/89-01 for unit 2. Also, TVA's corrective action for unit 2 is being tracked under Condition Adverse to Quality Report (CAQR) WBP 890153. No commitments are made in this submittal.
