Mr. Oliver D. Kingsley, Jr.
Senior Vice President, Nuclear Power
Tennessee Valley Authority
6N 38A Lookout Place
1101 Market Street
Chattanooga, Tennessee 37402-2801

Dear Mr. Kingsley:

SUBJECT: WATTS BAR NUCLEAR PLANT, UNITS 1 AND 2 - RESPONSE TO NRC
BULLETIN 88-04 - POTENTIAL SAFETY-RELATED PUMP LOSS (TAC 69991)

By letters dated February 27, and June 29, 1989, you responded to NRC Bulletin 88-04 regarding the adequacy of mini-flow systems for safety-related pumps. In your June 29, 1989 response, you provided the results of TVA's evaluation of the issues identified in the bulletin and list of commitments for Watts Bar. The response commits to completing corrective actions resulting from this bulletin including implementation prior to fuel load for each unit. Therefore, the staff considers your response to Bulletin 88-04 complete.

As discussed in Bulletin 88-04, within 30 days of completion of the long-term resolution actions, provide a written response describing the actions taken. You should document and maintain for at least two years an evaluation of your actions in responding to the bulletin. These records may be subject to future auditing.

If you have any questions, please contact R. Auluck, Project Manager at (301) 492-0759.

Sincerely,

Original signed by

Suzanne Black, Assistant Director
for Projects
TVA Projects Division
Office of Nuclear Reactor Regulation
