

January 9, 2008

APPLICANT: Dominion Virginia Power (Dominion)
FACILITY: North Anna Unit 3
SUBJECT: SUMMARY OF NOVEMBER 29, 2007, MEETING REGARDING THE
NORTH ANNA COMBINED LICENSE APPLICATION

On November 29, 2007, the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 2 public meeting at NRC Headquarters, 11555 Rockville Pike, Rockville, Maryland, with representatives of Dominion Virginia Power (Dominion). The purpose of the meeting was to familiarize the staff with the recently-tendered North Anna Unit 3 combined license (COL) application. The meeting agenda is provided as Enclosure 1 and attendees are identified in Enclosure 2.

This meeting summary and the presentation materials distributed at the meeting are available through the Agencywide Documents Access and Management System (ADAMS) as a package at Accession Number ML073551097. ADAMS is the system that provides text and image files of NRC's public documents. Documents are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. If you do not have access to ADAMS or have problems accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) staff at 1-800-397-4209, 301-415-4737, or pdr@nrc.gov.

On November 27, 2007, Dominion tendered the COL application for North Anna Unit 3, an economic simplified boiling water reactor (ESBWR) to be located at the North Anna Power Station and adjacent to the two existing operating nuclear reactors. This half-day public meeting provided the initial opportunity for Dominion to familiarize the staff with the overall structure and format of the Unit 3 COL application. The meeting consisted of presentations by several Dominion representatives and interactive discussions between the staff and Dominion on various application-related topics.

Staff from the Office of New Reactors provided meeting opening remarks, an overview of the acceptance review process and schedule for the North Anna COL application, and an overview of the process for concurrent staff review of the COL application and the ESBWR design certification. Dominion presented an orientation on the COL application to include the following topics: 1) the electronic submittal process and inclusion of the application and reference documents on a single DVD; 2) organization and general content of each part of the ten-part application; 3) standardization of the application with respect to the ESBWR design and subsequent COL applications referencing the ESBWR design; 4) application references to the ESBWR design control document and to documentation associated with the North Anna Early Site Permit; and 5) organization and format details of the application's final safety analysis report and environmental report. The Dominion presentations are available in ADAMS at Accession Numbers ML073340515, ML073340533, and ML073340577.

At the meeting's conclusion, there was general agreement among the staff that the presentations had been informative and provided a "jump-start" for the staff to commence the

COL application acceptance review. A follow-up on public meeting for the staff and Dominion to discuss COL application content and technical issues is planned for December 13-14, 2007.

Members of the public attended this meeting and no public meeting feedback forms were received. Please direct any inquires to me at 301-415-0224 or tak@nrc.gov.

/RA/

Thomas A. Kevern, Senior Project Manager
