

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555
April 23, 1985

Docket Nos: 50-390
and 50-391

APPLICANT: Tennessee Valley Authority

FACILITY: Watts Bar Nuclear Plant, Units 1 and 2

SUBJECT: SUMMARY OF MEETING TO DISCUSS WESTINGHOUSE OPTIMIZATION PROGRAM
IMPLEMENTATION IN THE WATTS BAR UNIT 1 TECHNICAL SPECIFICATIONS

On April 12, 1985, representatives from TVA and the NRC met to discuss implementation of the Westinghouse Optimization Program in the Watts Bar Unit 1 Technical Specifications. Enclosure (1) is a list of attendees.

During the meeting, the staff discussed suggested format changes and modifications to certain technical specifications and raised concerns regarding other changes proposed by TVA. TVA stated that many of their proposals were the results of discussions with RSB. Other proposals came from a commitment from the Westinghouse Owner's Group Committee to H. Denton that the utilities would not modify certain technical specifications resulting from the review of WCAP-10271. At the end of the meeting, the staff agreed to discuss its concerns with RSB and stated it would make a determination as to whether certain technical specifications (related to WCAP-10271) raised a safety concern.

Thomas J. Kenyon, Project Manager
Licensing Branch No. 4
Division of Licensing
