NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

September 27, 1990

Docket No. 50-390
50-391

MEMORANDUM FOR: Frederick J. Hebdon, Director
Project Directorate II-4
Division of Reactor Projects - I/II, NRR

FROM: Peter S. Tam, Senior Project Manager
Project Directorate II-4
Division of Reactor Projects - I/II, NRR

SUBJECT: WATTS BAR NUCLEAR PLANT -- RESPONSE TO
BULLETIN 88-10 AND SUPPLEMENT 1
(TAC 71373, 71374)

By letters dated April 11 and August 30, 1989, TVA responded to Bulletin 88-10. As a result of Supplement 1 to the bulletin, TVA responded by letter dated November 8, 1989, providing lists of installed breakers to supersede information contained in the August 30, 1989 letter. TVA stated that it has reviewed the responses of April 11 and August 30, 1989, and has verified that the responses meet the bulletin provisions as clarified by the NRC position conveyed by the supplement. TVA further stated that records are being maintained in accordance with the supplement requirements.

The staff has not performed a detailed technical review of TVA's responses; however, the staff may perform an inspection at a later date. If a subsequent inspection identifies deficiencies in TVA's actions and responses, this issue will be reopened. Therefore, consistent with instruction given by the lead project manager, J. C. Stone, in his memoranda dated March 21 and August 3, 1989, I consider this action complete.

By copy of this memorandum, Region I is advised of TVA's position on this matter.

Peter S. Tam, Senior Project Manager
Project Directorate II-4
Division of Reactor Projects - I
