

February 5, 1991

Docket Nos. 50-390
and 50-391

LICENSEE: Tennessee Valley Authority (TVA)
FACILITY: Watts Bar Nuclear Plant, Units 1 and 2
SUBJECT: MEETING SUMMARY - JANUARY 31, 1991 ROUTINE MEETING ON STATUS
OF VARIOUS LICENSING ISSUES (TAC 72494 and 72495)
REFERENCES: Meeting Notice by P. S. Tam (NRC), January 10, 1991

On January 31, 1991, the staff met with TVA representatives to discuss the status, needed actions, and schedules of various licensing issues. These include all the unresolved outstanding issues, confirmatory issues, proposed license conditions, corrective action programs (CAPs), special programs (SPs), TVA response to generic letters and bulletins, and upcoming NRR-led team inspections. Enclosure 1 is the meeting attendee list.

Schedular information obtained in the meeting has been used to update the NRR staff's information system, Workload Information and Scheduling Program (WISP), various flow charts showing milestones for the CAPs and SPs, and Chapter 1 of the upcoming Supplement No. 6 to the Safety Evaluation Report (SSER 6).

The staff encouraged TVA to gain access to the staff's document control system, NUDOCS. A number of other utilities already have such access. After the meeting, the staff informed Ms. R. Mays of TVA that a letter should be sent to Mrs. Patricia G. Norry, Acting Director of Office of Information Resources Management (with a copy of the letter to Mr. Jimmy D. Blanton) to request access to NUDOCS.

The next licensing status meeting would take place around March 12, 1991.

Original signed by

Peter S. Tam, Senior Project Manager
Project Directorate II-4
Division of Reactor Projects - I/II
