Docket No. 50-390

MEMORANDUM FOR: Frederick J. Hebdon, Director
Project Directorate II-4
Division of Reactor Projects
Office of Nuclear Reactor Regulation

FROM: E. William Brach, Chief
Performance and Quality Evaluation Branch
Division of Licensee Performance
and Quality Evaluation
Office of Nuclear Reactor Regulation

SUBJECT: WATTS BAR QA RECORDS REVIEW (TAC 71923)

TVA letters dated May 10 and July 2, 1991, respond to our comments on TVA's Additional Systematic Records Review (ASSR). The ASSR is to provide additional confirmation of the adequacy of QA records for Watts Bar Nuclear Plant Unit 1 (WBN-1). Our comments were transmitted to TVA by NRC letter dated March 20, 1991 and by conference call on June 26, 1991. We have reviewed the TVA letters.

We conclude that the response is acceptable and that the ASSR program, when completed in a conscientious manner, will show whether the QA records for WBN-1 are acceptable for licensing.
