RE: Notification of department move

Dear reviewer:

Included is written notification in accordance with NRC regulation 35.14.

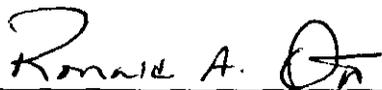

We are informing NRC that the area of use at Fitzgibbon Hospital, 2305 South 65 Highway, Marshall, MO 65340, is being moved from its current suite on the main floor as indicated in the application on file with NRC, to its new permanent location also on the main floor of the hospital. The former suite will have all radioactive material removed. A close out survey will be conducted at that time and will include ambient surveys and swipe testing for RAM contamination as per our current daily and weekly area survey and wipe testing procedures. All results will be filed and held for review during inspection by NRC. If a contaminated area is discovered at the time of the testing it will be decontaminated and the area released at the time it is determined to be at background levels.

A room diagram of the new Nuclear Medicine suite is attached for your convenience.

No other changes are being addressed at this time.

If you have any questions or comments, please do not hesitate to contact our RSO, Mark Beanblossom at (636) 987-2100.

Sincerely,

C.E.O.
