

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

January 2, 1992

Docket No. 50-390

FACILITY: WATTS BAR NUCLEAR PLANT, UNIT 1, TENNESSEE VALLEY
AUTHORITY

SUBJECT: MEETING SUMMARY - MEETING TO DISCUSS PRIORITY AND
SCHEDULE OF TECHNICAL SPECIFICATIONS DEVELOPMENT
(TAC M76742)

REFERENCE: Meeting Notice by P. S. Tam (NRC), December 9, 1991

The subject meeting was held on December 17, 1991, in NRC offices as a result of TVA's request. The purpose was to discuss various contingencies for the development of the Watts Bar Technical Specifications (TS). Enclosure 1 is the meeting participant list. Enclosure 2 is the handout material prepared by TVA, showing the meeting agenda and a diagrammatic representation of the proposed TS development schedule.

TVA personnel stated that they intend to use the new Westinghouse Standard Technical Specifications (STS, NUREG-1431) which is currently being developed as the Watts Bar Unit 1 TS template. However, they are concerned about the slow development of the STS. The staff stated that with a projected fuel load date of December 1993 (this is an unofficial date, used only by the staff for resource allocation purpose), the STS schedule should not interfere with the development of the Watts Bar Unit 1 TS.

The staff agreed to TVA's proposal to submit draft Watts Bar Technical Specifications modeled after the latest version of the new Westinghouse STS. The submittal would incorporate the latest industry comments on the STS that are applicable to Watts Bar. In addition, TVA will periodically revise the draft Watts Bar TS to incorporate the resolution of various industry comments on the draft STS as those are resolved. The staff stated that since Watts Bar Unit 1 is an NTOL (Near-Term Operating License) plant, top priority will be assigned to it in terms of staff resources, consistent with the staff's resource allocation practice.

TVA expects to submit the draft Watts Bar Unit 1 TS in August 1992, and at that time the staff will develop a review schedule for the submittal consistent with the licensing schedule/fuel load date of the unit.
