

March 13, 1992

Docket Nos. 50-390
and 50-391

LICENSEE: Tennessee Valley Authority (TVA)

FACILITY: Watts Bar Nuclear Plant, Units 1 and 2

SUBJECT: MEETING SUMMARY - MARCH 5, 1992, WORKING MEETING ON ENVIRONMENTAL QUALIFICATION (EQ) PROGRAM (TAC M63591 and M80453)

REFERENCES: (1) Meeting notice by P. Tam, February 25, 1992

(2) Documents on interim review results, docketed and placed in the PDRs, February 5, 1992

On March 5, 1992, NRC and TVA personnel met in a working meeting to address technical issues that arose as a result of the staff's review of TVA's EQ submittals dated September 30, 1986 and April 30, 1991. Enclosure 1 is the meeting participant list.

The staff is being assisted by EG&G Idaho, contractors on this review. The contractors' interim review results have been documented in Reference 2 and were discussed by the meeting participants. The staff indicated that the comments do not represent a formal request for information, but TVA is free to use the staff's comments to revise and implement the EQ program.

The staff stated that the EQ site audit should take place when implementation is nearly 100 percent complete. However, if EQ activities are on the critical path of issuance of the operating license, the staff would also be amenable to perform the audit when implementation is somewhat less than 100 percent. TVA and the staff agreed that for planning purposes, the tentative date for the audit should be early 1993.

Both TVA and NRC personnel considered the meeting an excellent opportunity to exchange technical information. While future meetings are likely, no agreement was made in such regard.

Originals signed by
 Peter S. Tam, Senior Project Manager
 Project Directorate II-4
 Division of Reactor Projects I/II
 Office of Nuclear Reactor Regulation
