

May 28, 1992

Docket Nos. 50-390
and 50-391

LICENSEE: Tennessee Valley Authority (TVA)

FACILITY: Watts Bar Nuclear Plant, Units 1 and 2

SUBJECT: MEETING SUMMARY - MAY 20, 1992, ROUTINE CONFERENCE
ON LICENSING STATUS (TAC NOS. M72494 and 72495)

On May 20, 1992, NRC and TVA representatives met at the NRC Region II office to discuss the status, needed actions, priorities and schedules of various licensing issues. These include all unresolved outstanding issues, confirmatory issues, proposed license conditions, corrective action programs (CAPs), special programs (Sps), TVA's response to generic letters and bulletins, and upcoming NRR-led team inspections. The discussion was based on the latest licensing status as published in the Watts Bar Safety Evaluation Report Supplement 8 (NUREG-0847, Supp. 8). Enclosure 1 is the list of meeting participants.

Schedular information and other comments were exchanged between TVA and NRR personnel, agreed upon, and subsequently used to update the NRR staff's work control system, Workload Information and Scheduling Program (WISP); this report is Enclosure 2. Updated schedular information regarding the CAPs and Sps is documented in Enclosure 3.

The Office of Nuclear Reactor Regulation (NRR) issues the Safety Evaluation Report (NUREG-0847) and supplements (SSERs) as its principal licensing basis documents for Watts Bar. Section 1 of the latest SSER (SSER 8) officially documents the issues that NRR considers needing resolution before an operating license can be granted.

TVA participants described the status of TVA's top 10 actions. These are flagged by appropriate indicators in Enclosure 2.

Original signed by
Peter S. Tam, Senior Project Manager
