

July 21, 1992

Docket No. 50-390

LICENSEE: Tennessee Valley Authority (TVA)
 FACILITY: Watts Bar Nuclear Plant, Unit 1
 SUBJECT: MEETING SUMMARY - July 17, 1992, MANAGEMENT MEETING ON
 WATTS BAR UNIT 1 (TAC M72494 and M72495)

On July 17, 1992, NRC and TVA representatives (see Enclosure 1 for list of participants) met in NRC headquarters to discuss TVA's perspective of the Watts Bar Unit 1 overall schedule.

Mr. W. Museler, Watts Bar Site Vice President, used the Watts Bar Unit 1 Integrated Level I Schedule (a site document) to show the logical accomplishment of milestones leading to fuel loading in January 1994. Mr. Museler stated that the next six months would be crucial since TVA has planned to complete most of the modification work (e.g., hangers, supports, flushing of systems) during that time. The uncertainty of the next six months comes from the fact that plant systems have not been in use for years and the actual condition of them is not known. However, if TVA can stay on schedule for the next six months, TVA is confident that it can hold the remainder of its activities, mainly pre-operation testing, to schedule in 1993.

The staff is not aware of any current NRR review issues that could prevent issuance of a low-power operating license by January 1994. The staff provided a graph showing the total number of unresolved issues documented in the Watts Bar SER and supplements (Enclosure 2).

TVA plans to have the site organization aligned to support plant operation by late 1992. Thus, an organization oriented towards operation will be in use approximately one year before fuel load.

MANAGEMENT MEETING - WATTS BAR, UNIT 1

July 17, 1992

<u>Name</u>	<u>Affiliation</u>
Dean Houston	Advisory Committee for Reactor Safeguards
Roger Huston	TVA Rockville Office Manager
Gus Lainas	NRC/NRR/AD for Region II Projects
Mark O. Medford	TVA VP for Nuclear Assurance, Licensing and Fuels
William Museler	TVA Watts Bar Site Vice President
George Pannell	TVA Watts Bar Site Licensing Manager
Peter Tam	NRC/NRR/Project Directorate II-4

WATTS BAR UNRESOLVED SSER ISSUES

(Total of Outstanding, Confirmatory issues,
Proposed license conditions, CAPs & SPs)

* During the licensing hiatus (between SSER 4 and 5), a number of licensing basis issues were opened. The staff started recognizing these as outstanding issues in SSER 6. Also, in SSER 6, the staff started formally recognizing CAPs and SPs whose program reviews were completed; the incomplete ones were added to the total of unresolved issues. This explains the "hump".
