Subject: Indian Point License Extension

Dear Mr. Pham / Ms. Caverly,

I understand that Indian Point will have to discontinue the use of once-through cooling under its state water permit after the current operating license period. I also understand that the NRC does not consider the conversion to another cooling method (e.g. closed-cycle) in the license extension system.

I could not find any reference to converting the Indian Point cooling system - is the proposed cooling system addressed / mentioned in the application for license extension?

Thank you,

Seth Parker
