Subject: Source Abandonment for Anglo-Suisse

Richard,

A follow-up to our conversation today, 12/20 at 1330, regarding the approval of the source abandonment in the following well:

Well Name: OCS 00384-016-ST01

Operator: Anglo-Suisse Offshore LLC

Source: Cs-137 1.7 Ci Serial# GGLS-D A2551

Depth: 8919 ft

Fishing Began: 12/17/07

Abandonment Plan:

1. The drill string will be backed-off or parted at some distance above the source. This distance will not be known until this operation is completed.
2. 200 feet of cement will be placed in the well above the source and this length of drill collars and pipe.
3. The drill collars will be used as the deflection device.
4. A decision on whether to sidetrack or abandon the well will be made after abandonment

Schlumberger will follow-up with a written report within 30 days with details on the completed abandonment.

Thank you for your help. Have a good holiday season.

Regards,
