Lots going on ... we determined that the missing pages are associated with another report prepared by another consultant by the name of Matson (apparently an ex-NRC TMI alum who raise the hydrogen bubble issue). We are told that the report is a chronology of NRC activities relative boric acid issues and a corresponding chronology of licensee activities.

We had a call with Kane, et al, on the path forward. We've requested FENOC to provide the report to us by COB Friday. NRR has the lead, but we are to review and provide input. We are planning a call on Monday with NRR to discuss the review of the info and our assessment. Also, received 14 q's from the Plain Dealer on the Exponent Report. OPA/HQ is taking the lead for revising the comm plan.

Jacobson is working from Dresden to provide input to NRR on the answer to the Plain Dealer. We have also asked him to review the Matson report this weekend. He did ask if he could get OT at home. I spoke to Dina and Mark and we agree that it would be OK under this circumstance. He is in the middle of a move and lives so far away, that we could be much more efficient in his review. Dina indicated that we would need to advise Jim tomorrow. You OK with that approach? An approximate estimate would be 4-6 hours of work - but he likely wouldn't get paid that much given his grade/step.
