SUBJECT: Review of Final Status Survey Report and Denial of Site Release as Requested

Dear Mr. Conant:

This refers to your September 13, 2007, letter that transmitted your Final Status Survey Report (FSSR), dated September 2007, for potentially impacted portions of the entire CE Windsor Site (ABB Inc.) excluding the FUSRAP areas and the Building 2, 5, 6A, and 17 Complexes. Per our conversation with you on December 12, 2007, the NRC will continue its review of the FSSR, but has suspended the decision to release any site areas until such time that we receive a request from ABB, Inc. that details the revised area for which you are requesting unrestricted release.

Since you will be requesting unconditional release for site areas adjacent to others where remediation may be in progress, in your submittal, please provide a description of the formal controls that you will implement to assure that the areas, which have been surveyed and have been requested for unrestricted release, are not impacted by any remediation activities.

If you have any questions, please call me at 610-337-5276. Thank you for your cooperation.

Sincerely,
