Mr. Bob Slack
Corporate RSO
Conam Inspection, Inc.
4491 Wanda Road
Edwardsville, IL 62025

Dear Mr. Slack:

Activities conducted under Reciprocity in the State of Arkansas, Reciprocity Number REC-256, were inspected in the field, by Katia Gray of Radiation Control, Arkansas Department of Health on November 15, 2007 at National Technical Systems in Camden, Arkansas. At the conclusion of the inspection, findings were discussed with Richard Disher and George Dean.

The purpose of this inspection was to evaluate licensed activities as they relate to radiation safety, compliance with the Arkansas State Board of Health Rules and Regulations for Control of Ionizing Radiation, and compliance with the conditions of the license. The evaluation consisted of selective examination of procedures and representative records, interviews with personnel, and observations of the inspector.

Due to the quantity and type of material you possess, you are subject to the security requirements outlined in the Increased Controls. Compliance with the Increased Controls was also reviewed during this inspection.

No violations or items of noncompliance were identified during this inspection.

We appreciate the time and assistance provided by your staff during the review of your program. If you have any questions concerning this inspection or if we can be of assistance to you, please contact the Radioactive Materials staff at (501) 661-2173. Please address correspondence to the above address or via fax to (501) 661-2849.

Sincerely,

Jared Thompson, Program Manager
Radioactive Materials Program
