Attention: Mr. Donald A. Nussbaumer, Chief,  
Source and Special Nuclear Materials Branch.

Subject: Proposed Amendment Number 20 to Special  
Nuclear Material License No. 53

Enclosure: (1) Shipment of excess uranium bearing  
material for reprocessing (6 copies)

Gentlemen:

*SEE Reports FILE*

We submit as Enclosure (1) our application to amend the Martin Marietta Special Nuclear Material License No. 53. This submission describes the proposed shipping containers and shipping methods to be utilized in the shipment of excess uranium bearing material to an off-site facility for uranium recovery processing. We have negotiated with Davison Chemical Company, Erwin, Tennessee for processing of uranium contained in air filters and shipment is desired as soon as possible. We have selected Mason Dixon for the shipment, by exclusive use of van, of the filters. The routing from Baltimore as supplied by Mason Dixon will be as follows:

- U.S. Route 40 to Frederick, Maryland
- U.S. Route 340 to U.S. Route 11
- U.S. Route 11 to Erwin, Tennessee (Destination)

Approval for shipment of the filters by the method described in the enclosure is requested as soon as possible. Since the quantity of other types of excess material has not been finalized at this time, we will submit additional shipping information as the quantities and shipping arrangements become firm.

Very truly yours,

*CW Keller*
