

**CW-11-2007 EXAM  
DRAFT OPERATING EXAM OUTLINE COMMENTS**

1. RO-2 is scheduled to see Scen-1 and Scen-2 and his I/C totals only amount to the minimum (4); this is dangerous planning since, if he fails to get credit for any one of those I/C events, he'll have to take the spare (Scen-4). On Scen-2, there are three component failures planned that are not being credited for any member of the crew – perhaps these could be replaced with more substantive events for the ATC position. [Fixed](#)
2. Since the SRO position for Scen-3 will be filled by a Surrogate, there is no need to include the TS calls in the scenario (Event 1 and 2). [Fixed](#)
3. How long will it take for the EDG to fail without ESW on Event-5 of Scen-2? [Added time to criteria.](#)
4. Which scenarios are new/modified/bank? [all new](#)
5. RO ADMIN – A1b: this JPM calls for access to the simulator, but the exam schedule will not support having candidates use the simulator for ADMIN JPMs. [Fixed](#)
