Memorandum

TO : Donald A. Nussbaumer, Chief
Source and Special Nuclear Materials Branch, DML

DATE: DEC 4 1964

FROM : Charles D. Luke, Chief *CDL*
Criticality Branch, DML

SUBJECT: MARTIN COMPANY, DOCKET NO. 70-58, APPLICATION DATE NOVEMBER 23, 1964

SYMBOL: DML:TGM

We have reviewed the subject application requesting authorization for the temporary storage of fuel tubes containing U(4.65%)O₂ pellets. It is understood that this is necessitated by a delay in supply of fuel element base plates.

Individual containers are limited to 2.12 kg U²³⁵ within an inner container 6.5" x 6.5" x 42". The containers are stacked two high with a 4" wood separator between tiers. Each group of four containers is banded to a pallet, so that containers form a two high planar array. This array is isolated by distance from two other arrays within the storage area.

We have no objection to the proposed request.
