This is to confirm that we do not plan to correspond with Martin Company regarding the subject inspection as no items of noncompliance or significant "safety items" were found during the inspection.

With respect to the licensee's possession of plutonium in Hurst dosimeters, Leo Dubinski, Compliance, informed R. G. Page during the week of January 11, 1965, that Region I, CO, had determined that the plutonium was license exempt as of the date of the inspection.
