SUBJECT: ANALYTICAL RESULTS FOR SOIL AND SWIPE SAMPLES ASSOCIATED WITH GENERAL ATOMICS IN LaJOLLA, CALIFORNIA (INSPECTION REPORT #070-00734/2007-02) [RFTA NO. 08-001]

Dear Mr. Evans:

The Oak Ridge Institute for Science and Education (ORISE) received two soil samples and three swipe samples associated with General Atomics in LaJolla, California on December 3, 2007. At your request, the soil samples were analyzed by gamma spectroscopy (GS) and the swipe samples were analyzed by low background alpha and beta counting (AP1, Revision 15; CP3, Revision 2). The analytical results for the swipes were all less than the removable release criteria of 1000 dpm per swipe for alpha and beta. The alpha minimum detectable concentration (MDC) was 8.9 dpm per swipe and the beta MDC was 15 dpm per swipe. The soil sample identifications are listed in Table 1. The GS data is presented in Table 2. The pertinent procedure references are provided in the tables.

ORISE's Quality Control (QC) requirements were met for these analyses. The QC files are available for your review upon request.

My contact information is listed below. You may also contact Wade Ivey at 865.576.9184 with any questions or comments.

Sincerely,

Dale Condra, Manager
Laboratory
