Subject: Renewal of Special Nuclear Material License No. 53

Dear Mr. Nussbaumer:

Reference (1) requested additional information in connection with the Martin-Marietta application for renewal of Special Nuclear Material License No. 53. Reference (2) supplied additional information for all questions with the exception of those dealing with nuclear safety and accident evaluation.

Attached are revisions to our original application to cover the nuclear safety and accident aspects for which you have requested amplification. We have also included a new section (Section VI) which defines the criteria which will apply for shipment of special nuclear material.

In our opinion this submission completes the supply of the additional information requested in reference (1). We will be pleased to discuss our application with you should you consider it advantageous.

Very truly yours,
