Subject: NRC's Electronic Distribution Initiative - Feedback requested by October 31, 2007

The Electronic Distribution Initiative (EDI) pilot program sponsored by the Division of Operating Reactor Licensing (DORL) within the Nuclear Regulatory Commission's Office of Nuclear Reactor Regulation (NRR) ended September 30, 2007. Recall that during the EDI pilot, we changed our distribution method from mailing paper copies of various operating reactor licensing documents to electronic mail (email). In order to evaluate the pilot program for possible enhancements, we are requesting any comments or suggestions you may have concerning the EDI process.

In particular, we would like to know: (1) how the Agencywide Documents and Access Management System (ADAMS) link worked for you; (2) if the information emailed to you via the ADAMS direct link was difficult to assimilate; (3) if there are other methods of electronic distribution that should be considered. We welcome any suggestions you may have in the email distribution approach because it is our goal to make distribution as efficient and effective as reasonably possible.

Please provide any feedback you may have to the following email address (LPL3-2@nrc.gov). We request that you provide a response by October 31, 2007.

Thank you for your participation in this important initiative.

Russell Gibbs, Branch Chief
NRR/DORL
Plant Licensing Branch LPL3-2
